

## EVALUATING THE IMMUNISATION SYSTEM

Complete as many of these as you can, and add anything else you think is relevant.

### ➔ National immunisation plans

#### WHAT ARE THE MAJOR HEALTH AND IMMUNISATION POLICIES?

Such as a National health plan or policy, any policies and legislation regarding immunisation, etc.  
Are they coordinated?

ANSWER:

#### IS THERE A COMPREHENSIVE MULTI- YEAR PLAN (cMYP) FOR IMMUNISATION? DO YOU HAVE A COPY?

Sources: Gavi country hub: <http://www.gavi.org/country>

ANSWER:

#### ARE THERE ANY SUB-NATIONAL IMMUNISATION PLANS? IF YES, WHERE? ARE THEY COORDINATED WITH THE NATIONAL PLAN?

ANSWER:

### ➔ Immunisation coverage

VACCINES CURRENTLY AVAILABLE IN YOUR COUNTRY OR PLANNED FOR INTRODUCTION*	CURRENTLY AVAILABLE	PLANNED FOR INTRODUCTION
Human papilloma virus (HPV)		
Inactivated Polio vaccine (IPV)		
Japanese encephalitis (JE)		
Measles (2nd dose)		
Measles-rubella		
Pentavalent		
Pneumococcal		
Rotavirus		
Meningitis A		
Yellow Fever		

## ➔ Coverage rate

VACCINES CURRENTLY AVAILABLE IN YOUR COUNTRY OR PLANNED FOR INTRODUCTION*	
Coverage rate: DTP3	
Immunisation rate: Measles	
Immunisation rate: 3 doses Hib	
Immunisation rate: 3 doses	
Pneumococcal vaccine	
Pneumonia treatment	
Diarrhoeal disease treatment	

## ➔ Equity of access to and uptake of vaccines

Equity of DTP3 coverage

Yes  No

Equity of measles coverage

Yes  No

Does your country measure equity of access to vaccines?

Yes  No

What measures or parameters of equity does it use?

(often wealth quin tiles, geography, gender or other)

Is equity measured or monitored at sub-national, district or community levels?

Yes  No

If Yes, list equity data by sub-national levels (Area 1 Area 2 Area 3, etc.)

## ➔ Strength of the routine immunisation system

### VACCINE SUPPLY CHAIN:

**Cold-chain and vaccine management systems:** are the systems getting vaccines to all communities?

Can they manage any planned new vaccines?

**Vaccine stock:** Is it well managed nationally and down to the community level? Are there stock-outs at the national or sub-national levels?

**Transport systems:** are they adequate to get vaccines even to remote locations?

## IMMUNISATION DELIVERY AND HEALTH CARE SYSTEM:

**Health services for immunisation:** Are the health services adequate and well-functioning (including sub-national, district, community levels)?

**Health care workers:** Are there health care workers trained in vaccines and immunisation in sub-national/community settings?

**Community health system:** Does it work well for children's caregivers and the community?

**Community involvement:** Is the community involved and engaged in ensuring the immunisation delivery system is appropriate and functioning well?

**Reaching the unreached:** What is being done to track and reach unvaccinated children, or those who drop-out?

## DATA AND DISEASE SURVEILLANCE

**Immunisation data:** Is there timely, reliable and comprehensive data on disease surveillance and vaccine coverage, importantly at the sub-national levels?

**Strengthening data:** What is being done to improve and strengthen the data collection system if it is weak?

## Financing vaccines and immunisation

### NATIONAL BUDGET:

What is national budget for vaccines and the immunisation system?

Is there a dedicated line in the national and/or health budget for immunisation See your cMYP, national health budget or health financing policy.

### ➔ Gavi and other sources of funding

Does your country receive funding from Gavi? List the types and amounts\*.

VACCINES	AMOUNT
Human papilloma virus (HPV)	
Inactivated Polio vaccine (IPV)	
Japanese encephalitis (JE)	
Measles (2nd dose)	
Measles-rubella	
Pentavalent	
Pneumococcal	
Rotavirus	
Meningitis A	
Yellow Fever	

OTHER TYPES OF SUPPORT	AMOUNT
Health system strengthening	
Civil Society Organisation support	
Immunisation services support (ISS)	

Does your national government receive support for immunisation and vaccines from any other sources? If yes, from where and how much?

### ➔ Co-financing and graduation

At what level does your country co-finance vaccines with Gavi? See your national cMYP.

Is your country scheduled for Gavi graduation? If yes, by what date?

Does your national government have a plan for sustainable financing after graduation? Check your national cMYP or National Financial Sustainability Plan if your country has one.

#### NOTES:
