

GAP ANALYSIS

Your Gap Analysis will help you to identify the change that is needed.

To conduct your gap analysis, look back at your landscape and stakeholder mappings to identify where the possible challenges and opportunities lie to strengthen routine immunisation.

➔ Questions to ask yourself

What is the current situation?

Answer:

What would be the ideal future situation? What is the issue that needs to be solved through a change to fill a gap?

Answer:

How do we get from here to there?

Answer:

What are the steps of change to bridge the gap?

Answer:

What is/are the ASK(S) to your decision-maker?

Answer:

NOTES:

➔ Instructions

Based on your review and findings, please complete the below table as follow:

In column 1 identify and describe the current situation

In column 2 identify and describe the desired future situation;

In column 3 identify and describe what the gap is (it can be a problem or an opportunity).

In column 4 identify and describe the steps needed to bridge your gap. In other words, describe what changes are needed and what your ASK will be.

The change we need to see to bridge the gap is the ASK.

Note: The example provided in italic aims to help you complete the gap analysis table.

ISSUE: CURRENT SITUATION	DESIRED FUTURE SITUATION	GAP = PROBLEM AND REASONS FOR THE PROBLEM	OPPORTUNITIES/ SOLUTIONS	STEPS TO BRIDGE GAP/CHANGE NEEDED = THE ASK
High under five mortality rate in XX health zone.	All children receive PCV vaccination to reach 100% coverage in XX health zone.	Half of the children in XX health zone are not reached and immunised with PCV because of vaccine stock-outs and dysfunctional vaccine delivery system.	Increase resources to improve vaccine delivery and stock management systems in XX health zone. Gap in vaccine stock management and delivery	Ensure that there are no vaccine shortages /stock-outs. ASK: relevant authority / decision-maker to secure funding for vaccine delivery and stock management in XX health zone.
